THE CONTRIBUTION OF ACCOUNTING TO COOPERATIVE MANAGEMENT OF WATER RESOURCES

CIFAL Roundtable Conference
15-16 October
Shona Russell, University of St Andrews
codified practices to compile, analyse, report & audit information for decision-making
a system to identify risks & inform investment decisions
a system of auditing & assurance practice to evaluate performance
Accounts & accounting can represent different values, make the invisible visible & engage stakeholders in water resource management
CONTRIBUTIONS

Provide information for decision-making in line with governance systems and scientific knowledge for water resource management.

Enable recognition of multiple values in decision-making through different channels of communication to support participation in decision-making.
